

How to buy a Lightning Systems electric vehicle

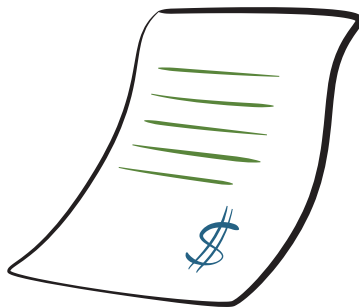

New vehicles must be purchased through dealerships, and so...

Lightning Systems works with your preferred dealer, or we can hook you up with one of our partner dealerships.

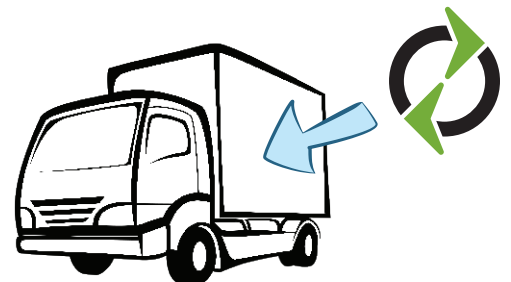

Lightning assists the dealer to ensure that any incentives (such as California's HVIP) are applied.

The dealer quotes the price of the vehicle, including the electric powertrain (installed) and any upfits (shelves, lifts, etc.), and any discounts from incentive programs.

Lightning takes care of the installation of the electric drivetrain, using local partners.

The customer purchases the completed vehicle from the dealership.
